Banish the winter blues by getting creative in the kitchen.

When the temperature starts to drop it's only natural to want to stay indoors, so now is the perfect time to give your kitchen a fresh look for the season. New tea towels are a great way to update your space instantly; look for textured weaves in warm shades such as red, yellow and orange for a burst of colour. If you enjoy cooking up a storm, a pretty apron, teamed with matching oven mitts and single and double oven mitts, are must-haves. At the table, elegant table linen in soft hues of taupe, white and grey will impress guests, while a patterned table runner adds interest to a plain tablecloth
