**Blue hue**  
 Kasbah **cushion** in  
 Royal, \$19.95, Rapee.

**Exotic elements**

This timber walkway leads to an outdoor shower in Anita's lush garden; originally there was just a simple hose. "I installed a real shower with hot water, and grew a wisteria plant around it to create a nice, private space," she says.

# GET Anita's LOOK

Mid-century furniture and eclectic accessories combine with the rustic and tribal for a **naturally stylish look**

**About: fireplaces** | Features and functions to consider when choosing a fireplace

- 1 **Inbuilt gas** Eco-friendly, low maintenance, with adjustable heat settings. Some models even come with a remote control. Easy to install and use. If it's a real wood look you're after, try a gas log fire heater.
- 2 **Wood stove** There are lots of different designs available – from traditional to contemporary glass-fronted, or open designs that can be suspended from the ceiling, like Anita's.
- 3 **Liquid fuel** Because these fireplaces run on ethanol or methylated spirits they are freestanding and mobile. With a wide range of sizes and designs you'll find a model to suit any space – large or small, indoors or out.
- 4 **Open** Perfect for outdoor use, freestanding wood-burning designs vary from cast-iron braziers and steel firepits to open steel or terracotta stoves with flues.

**Checked out**  
 Piano cotton/wool  
**rug** (1.4m x 2.8m),  
 \$580, WorldWeave.

**Tribal influence**  
 Teca curved **stool**  
 in Natural Teak, \$275,  
 Globe West.
